

Making your dream a reality...
one log at a time.

www.mclh.net

Our Goal: Making certain you love your home.

For over 30 years, Moosehead Cedar Log Homes has been crafting log homes that embody the love and tradition of this timeless lifestyle.

Distinctive homes require vision and expertise. Your vision, our expertise. Whether you're dreaming about building a getaway cottage, family residence, or luxury retreat, our experienced team of professionals can make your dream an affordable reality.

Our master designers and artisans are experienced in various building methods which include traditional prairie style log and purlin systems...to time saving pre-manufactured trusses. We believe that building a log home is not a process, but a partnership. It's our job to help you shape your ideas into a reality.

Manufactured with pride in Greenville, Maine.

Moosehead Cedar Log Homes is a locally owned and operated manufacturer located in beautiful Greenville, Maine. Because we are a manufacturer, we have total control of your project from design to delivery. We are with you every step of the way.

Originally established by a Maine logger in 1986 as a part time venture, Moosehead Cedar Log Homes was purchased

by native Maine residents Randy and Lucy Comber in 1996. With an entrepreneurial background, the Combers have married their love of Northern Maine with the development of a product that stands the test of time.

Planning your log home.

We offer a large selection of home plans that fit any lifestyle or budget. With over 30 years of experience, we have built a solid reputation of supplying one of the best log home kits on the market today.

Most customers will find a stock floor plan from our collection, or one that is similar to what they are looking for. This is when our in-house design service team steps in. They can help you modify or customize any floor plan

so that it truly becomes your family's dream home. Or, if you already have a design in mind, share it with us and let Moosehead Cedar Log Homes bring it to life.

Building your log home or commercial building.

Moosehead Cedar Log Homes designs your structure and prepares the construction and engineering drawings using a CAD 3D environment - giving you the best possible representation of your finished home or commercial building before construction even begins

We then prepare all the purchased materials for delivery to your building site. A Moosehead Cedar Log Homes representative will be on site awaiting delivery to ensure a smooth drop off and inspection of your package.

Many of our dealers are builders or construction managers and will remain available to both you and your contractor for the duration of your project.

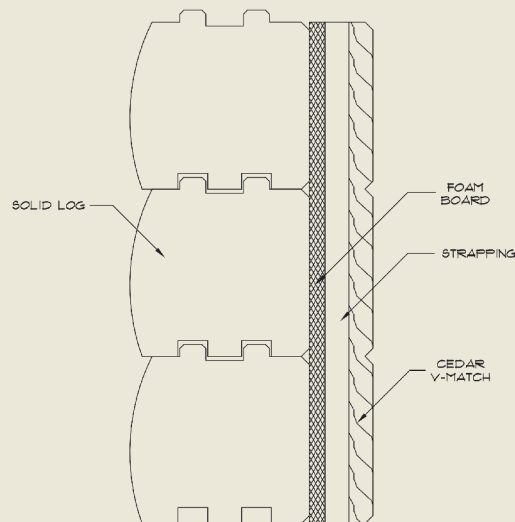

Why build with Cedar?

Moosehead Cedar Log Homes chooses materials from the finest White Cedar stands in the northern regions surrounding Maine. Our logs are selected, inspected and held to a quality standard that only cedar can attain.

Natural preservatives make it one of the most insect repellent of all wood species. Its closed cellular structure inhibits molds that attack and decay many other wood types. Our cedar logs are air dried to properly balance the moisture content, minimizing any warping or shrinking.

Rated at over 1.4 R factor per inch, the insulation factor of White Cedar is among the highest of any wood species. It is safe, and naturally environmentally friendly for you and your family.

Please ask about our optional insulation package solutions for the benefit of your heating and cooling efforts.

Wall R-values to R-26 and beyond are available.
